

Dear Mr. Scanlon:

I am asking Applebee's:

- 1) To make a clear national policy that mothers have a right to breastfeed in their stores without being asked to move, hide, cover up, or leave.
- 2) To train all employees that breastfeeding is different from other behaviors that customers might complain about (such as loud music, offensive language, etc.), and that employees are never to ask a breastfeeding mother to move, hide, cover up, or leave. Instead employees can advise the complaining customer to avert their eyes or move to a different part of the store.
- 3) To make the public aware of this policy.
